IMPORTANT: INVESTMENTS INVOLVE RISKS. INVESTORS MAY SUSTAIN A TOTAL LOSS OF THEIR INVESTMENT IN THE LYXOR ETFs. INVESTORS SHOULD NOTE THAT:

- Each Lyxor ETF is constituted as a fonds commun de placement under French law, and primarily regulated by the AMF, the French financial regulator, and is a form of contractual and unincorporated mutual fund. Holders may have limited rights compared with those available to holders of units of a unit trust constituted under the laws of Hong Kong in the manner more particularly described in the Section of this Prospectus entitled "Waivers granted by the SFC".
- Each Lyxor ETF's investment objective is to provide investment results that closely correspond to the performance of the relevant Underlying Index, increased, if applicable, by the potential dividends as may be distributed by the constituent stocks of the relevant Underlying Index and calculated net of any applicable tax.
- Certain markets represented by the relevant Underlying Indices, in particular, the developing markets, are subject to greater risks than other markets, the reason(s) for such greater risks in relation to such markets is/are more particularly described in the relevant Section(s) of Part 2 of the Prospectus.
- The value of any Lyxor ETF may be volatile and could go down substantially within a short period of time. It is possible that investors may lose some or the entire amount they have invested in the relevant Lyxor ETF.
- Each Lyxor ETF will not necessarily invest in shares or futures constituting the relevant Underlying Index, and instead adopts a "synthetic replication" investment strategy, pursuant to which the Manager has, on behalf of each Lyxor ETF and subject to a counterparty risk limit of 10% (in terms of mark-to-market value of the relevant index swap agreement) of the relevant Lyxor ETF's net assets, entered into an index swap agreement, a financial derivative instrument negotiated over-the-counter, with Société Générale, a licensed bank incorporated under the laws of France, and invests in a portfolio of listed shares which may not comprise the shares or the futures constituting the relevant Underlying Index. As a result, each Lyxor ETF is exposed to counterparty risk in that Société Générale may be unable to honour its commitments. Such risk is limited to 10% of a Lyxor ETF's net assets, subject to the fact that no passive non-compliance of such limit has occurred.
- The insolvency of Société Générale as the counterparty of each of the Lyxor ETFs under the relevant index swap agreement, or any relevant default(s) by Société Générale under the relevant index swap agreement, may lead to dealings in the Units of the relevant Lyxor ETF(s) being suspended, and the relevant Lyxor ETF(s) may even be terminated or suffer significant losses, depending on the then market value(s) of the portfolio(s) of listed shares held by the relevant Lyxor ETF(s) at the time of the insolvency and/or (as the case may be) at the time(s) of the relevant default(s) by Société Générale under the relevant index swap agreement(s).
- Conflicts of interest may arise as the Manager, the Custodian, the counterparty of the index swap agreement, the Market Maker, the Participating Dealer and the Hong Kong Representative all belong to the Société Générale Group.
- The Units of the Lyxor ETFs are traded on the SEHK. Their prices on the SEHK are based on secondary market trading factors and may deviate significantly from their net asset values.
- Prospective investors should take steps to ensure that they fully understand the transaction and have made an independent assessment of the appropriateness of the transaction in the light of their own objectives and circumstances, including the possible risks and benefits of entering into such transaction. Prospective investors should also consider seeking independent professional advice in making this assessment.
