

IMPORTANT:

- The Ping An of China CSI 5-10Y CGB ETF (the 「CGB ETF」) is an index-tracking exchange traded fund, which seeks to track the performance of the CSI PingAn 5-10y CGB Benchmark Index (the 「Underlying Index」). The return may deviate from that of its Underlying Index.
- The Underlying Index tracks the performance of a single geographical region, namely the PRC and is concentrated in bonds of a single issuer. The NAV of the CGB ETF is therefore likely to be more volatile than a more broad-based fund, such as a global bond fund, as the Underlying Index is more susceptible to fluctuations in value resulting from adverse changes in the financial condition of the PRC government and changes in economic or political conditions which affect the PRC.
- The CGB ETF is expected to have 15 - 20 constituents. The CGB ETF is therefore relatively concentrated in a limited number of CGB. The CGB ETF is likely to be more volatile than a fund tracking an index with a greater number of constituents, as the adverse performance of a constituent will have a greater impact on the value of the CGB ETF.
- There is no guarantee of the repayment of principal. Your investment in the fund may suffer losses.
- Dividend distributions are not guaranteed and are subject to the discretion of the Manager.
- The units of the CGB ETF may trade at a discount or premium to the net asset value of the units, which may go up as well as down.
- Investment involves risks and the CGB ETF may not be suitable for everyone. Investors should read the Prospectus and Product Key Facts Statement carefully for further details including various risk factors and consider their own investment objectives and other circumstances before investing.
- Indexing investment approach aims to achieve an investment performance that closely corresponds with the underlying index, either by a Replication Strategy or by a Representative Sampling Strategy as described under "Principal Investment Strategies of the Index Funds".

Investment Objective

The Ping An of China CSI 5-10Y CGB ETF aims to track the performance of the CSI PingAn 5-10y CGB Benchmark Index (the "Index").

About the Index

The CSI PingAn 5-10y CGB Benchmark Index is a rule-based index which seeks to reflect and track the liquid 5-10 years tenor CGB market. The Index is a total return index which calculates the performance of the index constituents on the basis that any dividends or distributions are reinvested.
