

IMPORTANT: Investment involves risk, including the loss of principal. Investors should refer to the Prospectus and Key Facts Statement of Premia CSI Caixin China New Economy ETF (the "ETF") for details, including the risk factors. Investors should not base investment decisions on this material alone. Investors should note:

- The ETF aims to provide investment results that, before fees and expenses, correspond to the performance of CSI Caixin Rayliant New Economic Engine Index ("Index").
- **Fundamental multi-factor weighted index risks:** The Index is a new fundamental multi-factor weighted index whereby constituents are selected and weighted based on certain investment factors. There can be no assurance that the Index will outperform the market at any time. The Index methodology of focusing on certain factors may lead to unintended portfolio concentration in specific industries.
- **Stock Connect associated risk:** The ETF will invest primarily in A-Shares via the Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect (collectively "Stock Connect") and is subject to the Stock Connect associated risks. The relevant rules and regulations on Stock Connect are subject to change which may have potential retrospective effect.
- **SME Board and ChiNext market risks:** The ETF may invest substantially in the ChiNext market and/or stocks listed on the Small and Medium Enterprise board (the "SME Board") of the Shenzhen Stock Exchange. The ETF is therefore subject to higher fluctuation on stock prices, over-valuation risk, differences in regulations, delisting risks.
- **Risk associated with small-capitalisation/mid-capitalisation companies:** The stock of small/mid-capitalisation companies may have lower liquidity and their prices are more volatile to adverse economic developments than those of larger capitalisation companies.
- **New economy companies risk:** The ETF will invest in companies in various new economy industries including information technology, environment protection and finance services. They are subject to higher market volatility and risks and their performance may be materially affected by worldwide scientific or technological developments or adverse events in their industries or development.
- **RMB currency and conversion risks:** The base currency of the ETF is RMB and the distributions are in RMB. RMB is currently not freely convertible and is subject to exchange controls and restrictions. Depreciation of RMB could adversely affect the value of investor's investment. Non-RMB based investors are therefore exposed to foreign exchange risk.
- **Concentration / PRC market risks:** The ETF is subject to PRC market risks. The A-share market in the PRC is highly volatile and may be subject to potential settlement difficulties. Such volatility may result in suspension of A-shares or imposition of other measures by the PRC authorities affecting the dealing/trading of units and adversely affecting the ETF's value. Securities exchanges in the PRC have the right to suspend or limit trading in any security traded on the relevant exchange.
- **Distributions out of or effectively out of capital risks:** The Manager may at its discretion pay dividends out of the capital or effectively out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gain attributable to that original investment. Any such distributions may result in an immediate reduction in the NAV of the ETF.
- **Trading risks:** The Units of the ETF are traded on the SEHK. The trading price of the Units is subject to market forces and may trade at a substantial premium or discount to the ETF's NAV.
- **Termination risks:** In the event the ETF is terminated, a Unitholder may not be able to recover their capital invested and may suffer loss.

INVESTMENT OBJECTIVE

The ETF tracks the investment results, before fees and expenses, of the CSI Caixin Rayliant New Economic Engine Index, which consists of approximately 300 Shanghai and Shenzhen listed stocks from new economy industries, selected based on non-fixed asset size, financial health and growth characteristics. It is a physical A-shares ETF under Stock Connect and utilizes a multi-factor approach.

[#] From date of listing to end of 2017

Past performance is not indicative of future performance. Investors may not get back the full amount invested. The computation basis of the performance is based on the calendar year end, NAV-to-NAV, with dividend reinvested. These figures show by how much the fund increased or decreased in value during the period shown. Performance data has been calculated in RMB including ongoing charges and excluding trading costs on SEHK you might have to pay. Where no past performance is shown, there was insufficient data available in that year to provide performance. Fund launch date: 20 October 2017.

Disclaimer This document is prepared and issued by Premia Partners Company Limited. Premia ETF Series are funds authorized by Hong Kong Securities and Futures Commission ("SFC"). SFC is not a recommendation or endorsement of Premia ETF Series and it does not guarantee the commercial merits of the scheme and its performance. This document has not been reviewed by the SFC and does not constitute an offer, recommendation or solicitation to buy or sell any security or enter into any other transaction in any jurisdiction. For potential investors in jurisdictions other than in Hong Kong, please seek professional advice on the eligibility of subscription of the funds. Unless otherwise specified, all information is as of 31 Dec 2018. Sources: Bloomberg and Premia Partners. The above data is for information only. **Past performance does not guarantee future results.** Investment involves risk, including possible loss of principal. Investment in emerging market countries may involve heightened risks such as increased volatility and lower trading volume, and may be subject to a greater risk of loss than investment in a developed country. Before deciding to invest, investors should read the Prospectus and Key Fact Statements for details, including the risk factors. Investors may not get back the amount they invest. Individual stock prices/performance do not represent the return of the Fund. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than the original cost.

Index Disclaimer CSI Caixin Rayliant New Economic Engine Index ("Index") is calculated by China Securities Index Company Limited ("CSI").
