

HANG SENG RMB GOLD ETF

(SEHK STOCK CODE : 83168)

www.hangsenginvestment.com

IMPORTANT RISK WARNINGS / FUND INFORMATION FOR HONG KONG INVESTORS

- Hang Seng RMB Gold ETF (the "Fund") aims to provide investment results denominated in Renminbi ("RMB") that, before fees and expenses and other hedging costs, closely correspond to the performance of the LBMA Gold Price AM in US dollars ("USD"). The Fund will seek to hedge against the foreign exchange rate movements between RMB and USD so that its performance in RMB will, before fees and expenses and other hedging costs, track the performance of the LBMA Gold Price AM in USD as closely as possible. The performance of the Fund is not expected to be materially affected by the foreign exchange rate movements between RMB and USD. However, investors will be subject to the foreign exchange rate risk when they realise their investment and convert the RMB proceeds into other currencies (for example HK dollars). There can be no assurance that the Fund will achieve its investment objective.
- The trading price of the Fund's Units on The Stock Exchange of Hong Kong Limited (the "SEHK") will be subject to market forces and may deviate significantly from the Net Asset Value per Unit.
- The Fund primarily invests in Bullion (as defined in the Fund's Prospectus). There is no guarantee that the price of Bullion will appreciate. The Fund may experience greater volatility and may be adversely affected by the performance of industries and sectors or events related to gold and to its production and sale and will cause a fall in the price of the Fund.
- The custody of Bullion for the Fund is different to custody arrangements typical in mutual funds/unit trusts which invest in equities and bonds. Among which include, but not limited to, the Bullion held by the Custodian may be lost or damaged and such Bullion may not be insured.
- The Fund is denominated in RMB which is currently not freely convertible and is subject to exchange controls and restrictions. The Fund is subject to risks associated with RMB including RMB foreign exchange risk, RMB hedging risk, offshore RMB ("CNH") market risk and RMB trading and settlement of Fund's Units risk.
- The LBMA Gold Price AM is quoted in USD. The Fund will enter into a series of swaps with the Swap Counterparty to hedge against the foreign exchange rate movements between RMB and USD. In the event of an insolvency or default by the Swap Counterparty, the Fund may be exposed to RMB/USD foreign exchange risk on an unhedged basis.
- The Fund is also subject to tracking error risks, risks associated with passive investments and risks of concentration in a particular commodity (i.e. gold).
- Investment involves risks and investors may lose a substantial part of their investment in the Fund.
- Investors should not only base on this factsheet alone to make the investment decision, but should read the Fund's offering documents (including the full text of the risk factors stated therein) in detail.

INVESTMENT OBJECTIVE

The investment objective of the Fund is to provide investment results denominated in RMB that, before fees and expenses and other hedging costs, closely correspond to the performance of the LBMA Gold Price AM in USD. The Fund will seek to hedge against the foreign exchange rate movements between RMB and USD so that its performance in RMB will, before fees and expenses and other hedging costs, track the performance of the LBMA Gold Price AM in USD as closely as possible.
