

IMPORTANT: Investment involves risk, including the loss of principal. Investors should refer to the Prospectus and Key Facts Statement of the Premia Asia Innovative Technology ETF ("ETF") for details, including the risk factors. Investors should not base investment decisions on this marketing material alone. Investors should note:

- The ETF aims to provide investment results that, before fees and expenses, closely correspond to the performance of Premia FactSet Asia Innovative Technology Index ("Index"). There can be no assurance that the ETF will achieve its investment objective.
- Emerging markets risk:** The Sub-Fund invests in emerging markets which may involve increased risks and special considerations not typically associated with investment in more developed markets, such as liquidity risks, currency risks/control, political and economic uncertainties, legal and taxation risks, settlement risks, custody risk, currency devaluation, inflation and the likelihood of a high degree of volatility.
- Technology sector and concentration risk:** Due to the concentration of the Index in the technology sector, the performance of the Index may be more volatile when compared to other broad-based stock indices. The price volatility of the Sub-Fund may be greater than the price volatility of exchange traded funds tracking more broad-based indices.
- Software, internet and related services industries risks:** Many of the companies in the software, internet and related services industries have a relatively short operating history. Rapid changes could render obsolete the products and services offered by the companies in which the Sub-Fund invests and cause severe or complete declines in the prices of the securities of those companies. The internet business is subject to complex laws and regulations which are subject to change and uncertain interpretation.
- Consumption sector risk:** The performance of companies active in the consumer sector are correlated to the growth rate of the Asian consumer market, individual income levels and their impact on levels of domestic consumer spending in the Asian markets, which in turn depend on the worldwide economic conditions. These companies may also be subject to government regulation affection production methods, which may have an adverse impact on their operating results and profit margin.
- Risks associated with N-Shares:** Companies issuing N-Shares often have business operations in PRC and are subject to certain political and economic risks in the PRC. The American stock market may behave very differently from the PRC stock market, and there may be little to no correlation between the performance of the two.
- Risks associated with P-Chips:** P-Chips are subject to risks similar to those associated with investments in H-Shares. They are also subject to risks affecting their jurisdiction of incorporation, including any legal or tax changes.
- Risks associated with Red Chips:** Investing in Red Chips involves risks that political changes, social instability, regulatory uncertainty, adverse diplomatic developments, asset expropriation or nationalisation, or confiscatory taxation could adversely affect the performance of Red Chip companies. Red Chip companies may be less efficiently run and less profitable than other companies.
- Risks associated with depositary receipts:** Exposure to depositary receipts including American Depositary Receipts ("ADRs") may be subject to risks such as non-segregation under applicable law of the depositary bank who hold the underlying stock as collateral and its own assets. Holders of depositary receipts are not direct shareholders of the underlying company and generally do not have voting and other shareholder rights as shareholders do. The Sub-Fund may also be subject to liquidity risk as depositary receipts are often less liquid than the corresponding underlying stocks.
- ChiNext market risks:** The Sub-Fund's investments in the ChiNext market of the SZSE may result in significant losses for the Sub-Fund and its investors. Risks include higher fluctuation on stock prices, over-valuation risk and differences in regulation and delisting risk.

INVESTMENT OBJECTIVE

The ETF tracks the investment results, before fees and expenses, of the Premia FactSet Asia Innovative Technology Index, which consists of technology-enabled innovation leaders in Asia (using revenue-based company selection in partnership with FactSet), allowing investors to capture Asian Innovation Megatrends including Digital Transformation, Healthcare Innovation, and Robotics & Automation.

From date of listing to end of 2018

Past performance is not indicative of future performance. Investors may not get back the full amount invested. The computation basis of the performance is based on the calendar year end, NAV-to-NAV, with dividend reinvested. These figures show by how much the fund increased or decreased in value during the period shown. Performance data has been calculated in USD including ongoing charges and excluding trading costs on SEHK you might have to pay. Where no past performance is shown there was insufficient data available in that year to provide performance. Fund launch date: 1 August 2018.

ABOUT PREMIA PARTNERS

Premia Partners is an investment firm founded in Hong Kong in 2016, by a group of enthusiasts who believe in enabling investors with efficient investment tools and see enormous scope for innovation in the Asian ETF industry. The team came from various incumbent global and regional industry leaders and shares one common goal – to reshape the ETF landscape in Asia by applying our collective knowledge and execution experience as well as by collaborating with the best-in-class global experts to curate ETF and smart beta solutions for investors. In Asia, and for Asia – because this is our home. For more information, please visit www.premia-partners.com

Disclaimer This document is prepared and issued by Premia Partners Company Limited. Premia ETF Series are funds authorized by Hong Kong Securities and Futures Commission (“SFC”). SFC is not a recommendation or endorsement of Premia ETF Series and it does not guarantee the commercial merits of the scheme and its performance. This document has not been reviewed by the SFC and does not constitute an offer, recommendation or solicitation to buy or sell any security or enter into any other transaction in any jurisdiction. For potential investors in jurisdictions other than in Hong Kong, please seek professional advice on the eligibility of subscription of the funds. Unless otherwise specified, all information is as of 30 Nov 2018. Sources: Bloomberg and Premia Partners. The above data is for information only. **Past performance does not guarantee future results.** Investment involves risk, including possible loss of principal. Investment in emerging market countries may involve heightened risks such as increased volatility and lower trading volume, and may be subject to a greater risk of loss than investment in a developed country. Before deciding to invest, investors should read the Prospectus and Key Fact Statements for details, including the risk factors. Investors may not get back the amount they invest. Individual stock prices/performance do not represent the return of the Fund. Investment return and principal value of an investment will fluctuate so that an investor’s shares, when sold or redeemed, may be worth more or less than the original cost.
