Vanguard FTSE Asia ex Japan Index ETF (2805)

An exchange-traded fund

IMPORTANT: Investment involves risk, including the loss of principal. Investors are advised to consider their own investment objectives and circumstances in determining the suitability of an investment in the Vanguard FTSE Asia ex Japan Index ETF (the "Fund"). If you are in any doubt, you should seek professional advice. Investors should refer to the Fund prospectus for further details, including the product features and risk factors. Investors should not base investment decisions on this marketing material alone. Investors should note:

- The Fund aims to provide investment results that, before fees and expenses, closely correspond to the performance of the FTSE Asia Pacific ex Japan, Australia and New Zealand Index.
- The Fund invests in securities markets that are considered to be emerging markets which involve a greater risk of loss than investing in more developed markets due to, among other factors, greater political, tax, economic, foreign exchange, liquidity and regulatory risks.
- The Fund invests in financial derivatives instruments ("FDIs"), which are more sensitive to changes in market prices of the underlying assets, and investing in FDIs may expose investors to a higher degree of fluctuation and the Fund may be exposed to credit risk on the counterparties with which it trades FDIs.
- The shares of the Fund are traded on the Stock Exchange of Hong Kong Limited ("SEHK"). Their prices on the SEHK are based on secondary market trading factors, and the Fund's market prices may deviate significantly from the net asset value.
