

CSOP MSCI T50 ETF

Stock Code: 3021

All information as of 31 July 2017

IMPORTANT: Investment involves risks. Investment value may rise or fall. Past performance information presented is not indicative of future performance. Investors should refer to the Prospectus and the Product Key Facts Statement for further details, including product features and risk factors. Investors should not base on this material alone to make investment decisions.

- CSOP MSCI T50 ETF (the "Sub-fund") is a physical index tracking exchange traded fund and it aims to provide investment results that, before deduction of fees and expenses, closely correspond to the performance of the Underlying Index, namely, MSCI China and USA Internet Top 50 Equal Weighted Index (the "Underlying Index").
- The Underlying Index is an equal weighted index designed to reflect the performance of the 50 largest internet software and services and internet retail entities selected by full market capitalization (i.e. 2% for each issuer) listed in the United States and Hong Kong markets. The Sub-Fund by tracking an equal weighted index may have relatively large holdings in companies with relatively smaller market capitalization than it would have held if the Underlying Index is a capitalization weighted index.
- Companies in the internet industry may have a relatively short operating history and may face dramatic and unpredictable changes in growth rates and competition for the services of qualified personnel. Investments in this market may be subject to higher volatility.
- There may be substantial government intervention in the internet industry. The internet business is subject to complex laws and regulations which are subject to change and uncertainty.
- The Sub-Fund primarily invests in securities listed in the US and Hong Kong markets, with focus in internet sector and may therefore be more volatile than a broad-based fund.
- Differences in trading hours between the US stock exchanges and the Stock Exchange of Hong Kong ("SEHK") may also lead to unavailability of the market prices of index constituents listed on US stock exchanges and the Index level. This may increase the level of premium/ discount of the price of units of the Sub-Fund to its NAV.
- Retail investors can only trade units of the Sub-Fund on the SEHK. The trading price of the units may be different from the Sub-Fund's NAV.

Investment Objective

The Sub-fund is a physical ETF that seeks to provide investment results that, before deduction of fees and expenses, closely correspond to the performance of the Underlying Index, namely, MSCI China and USA Internet Top 50 Equal Weighted Index.
