

Important

- db x-trackers* (*This includes synthetic ETFs) is an umbrella fund with a series of different sub-funds (each a “Sub-Fund”) which are exchange-traded funds (“ETFs”) tracking different underlying indices with different risk profiles.
- The shares of the Sub-Funds which invest in a single country or sector are likely to be more volatile than a broad-based fund as it is more susceptible to fluctuations in value resulting from adverse conditions in that single country or sector.
- The shares of the Sub-Funds may trade at a discount or premium to their net asset value (“NAV”).
- An investment in the shares of the Sub-Funds may directly or indirectly involve exchange rate risk.
- Investment involves risks. The Sub-Funds may not be suitable for all investors. Prospective investors should carefully read the Hong Kong Prospectus for further details on product features and risks, and should consider seeking independent professional advice in making their assessment.

Indirect Replication Funds

- Certain Sub-Funds adopt an indirect investment policy (also known as “synthetic replication”) (each an “Indirect Replication Fund”) by investing in swap transaction(s), which is a financial derivative instrument, linked to an underlying index. Currently, Deutsche Bank AG (“DB”) is the only swap counterparty of all Indirect Replication Funds. Investors in an Indirect Replication Fund are therefore subject to the counterparty and credit risk of DB.
- Each Indirect Replication Fund either puts in place a collateral arrangement where collateral securities are pledged in favour of such Indirect Replication Fund or invests in a portfolio of securities (“invested assets”), both with a view to ensure that the net exposure of such Indirect Replication Fund to DB is limited to no more than 0% of its NAV at the end of a trading day. The collateral securities and invested assets generally are not constituents of the underlying index. These arrangements are subject to risks, including failure on the part of DB to fulfil its obligations under the swap or collateral arrangements, a substantial drop in market value of the invested assets or collateral securities, settlement risk, or the insolvency or default of DB.
- Insolvency or default of DB may lead to dealing in the shares of the Indirect Replication Funds being suspended, and the Indirect Replication Funds may suffer significant losses and may even be terminated.
- Both the management company and the swap counterparty of the Indirect Replication Funds belong to DB Group. Furthermore, DB acts as swap counterparty and swap calculation agent in respect of all the Indirect Replication Funds to which the Hong Kong Prospectus relates. DB is also the Index Sponsor for the underlying indices of some of the Indirect Replication Funds. All of these may give rise to potential conflicts of interest.

Direct Replication Funds

- Certain Sub-Funds adopt a direct investment policy (each a “Direct Replication Fund”) by directly investing in a portfolio of transferable securities that may comprise all or a substantial number of the constituents of the relevant underlying index broadly in proportion to the respective weightings of the constituents, or other eligible assets.
- A Direct Replication Fund may utilise financial derivative instruments (“FDIs”) for investment and/or hedging purposes. The use of derivatives exposes a Direct Replication Fund to additional risks, including volatility risk, leverage risk, liquidity risk, correlation risk, counterparty risk, legal risks and settlement risks.
- Due to various factors, including fees, legal or regulatory restrictions and certain securities being illiquid, it may not be practicable to purchase all of the constituents in proportion to their weighting in the underlying index. A Direct Replication Fund will be subject to a greater tracking error in such circumstances.
- A Direct Replication Fund entering into a securities lending transaction is subject to counterparty risk, collateral risk, limited nature of indemnity from securities lending agent risk, operational risk and conflicts of interests risk.

Emerging market ETFs

- The investment objective of certain Sub-Funds is to track the performance of certain emerging markets and as such, the Sub-Funds are subject to a greater risk of loss than investments in a developed market due to, among other factors, greater political, economic, foreign exchange, liquidity and regulatory risks.

A-Shares ETFs

- The investment objective of certain Indirect Replication Funds (“A Shares Sub-Funds”) is to track the performance of an index comprising A shares listed in the PRC. Each A Shares Sub-Fund seeks exposure to the relevant index by entering into swap transaction(s) with DB, which is a qualified foreign institutional investor (“QFII”).
- Given that the A-share market is considered volatile and unstable (with the risk of suspension of a particular stock and/or the whole market, whether as a result of government intervention or otherwise), the subscription and redemption of the shares of the A Shares Sub-Funds may also be disrupted.
- Currently QFIIs are temporarily exempt from PRC capital gains tax with respect to gains derived from the trading of A shares. When such exemption expires, the valuation of the swap transaction(s) may be negatively impacted to reflect PRC capital gains tax payable by DB in relation to the swap transaction(s).
- Any changes to the QFII regulation may have a detrimental impact on the ability of the A Shares Sub-Fund to achieve its investment objective. In the worst case scenario, this could lead to the A Shares Sub-Fund being terminated.
- Each A Shares Sub-Fund is subject to emerging market risk as a result of tracking the performance of the PRC market.
- Each A Shares Sub-Fund is also subject to concentration risk as a result of tracking the performance of a single country (the PRC) and sector (except for db x-trackers CSI300 UCITS ETF* (*This is a synthetic ETF)). A Sub-Fund which invests in a single country or sector is likely to be more volatile than a broad-based fund as it is more susceptible to fluctuations in value resulting from adverse conditions in that single country or sector.

ETFs which offer Share Class “D” Distribution Shares

- db x-trackers* (*This includes synthetic ETFs) may pay a dividend even where there is no net distributable income (defined as investment income (i.e. dividend income and interest income) minus fees and expenses) attributable to the relevant share class. In other words, such dividend may be treated as being paid out of the capital of a Sub-Fund.
- Alternatively, db x-trackers* (*This includes synthetic ETFs) may pay a dividend out of gross income while charging all or part of a Sub-Fund’s fees and expenses to the capital of that Sub-Fund, resulting in an increase in the distributable income for the payment of dividends by that Sub-Fund. In other words, such dividend may be treated as being effectively paid out of the capital of that Sub-Fund.
- Payment of dividends out of capital amounts to a return or withdrawal of part of an investor’s original investment or from any capital gains attributable to that original investment.
- Any distributions involving payment of dividends out of a Sub-Fund’s capital or payment of dividends effectively out of a Sub-Fund’s capital may result in an immediate reduction of the NAV.

Investors should not make investment decisions based only on this document.

db x-trackers MSCI Russia Capped Index UCITS ETF* (*This is a synthetic ETF)

a sub fund of db x-trackers.

db X-trackers ETFs - Deutsche AM Exchange Traded Funds

Xtrackers is the brand name for the exchange-traded funds (ETF) managed by Deutsche Asset Management. ETFs are regulated, open-ended investment funds that trade on stock exchanges just like any other listed, tradable security. They combine in a single, easy to use product the key intraday trading and liquidity elements of stocks with the diversification offered by an index fund. Since launch in 2007, Xtrackers has grown rapidly. It now has around HKD 561.03 bn in assets under management (as of August, 2017) across more than 150 products, making Xtrackers one of the largest ETF provider in Europe and amongst the top providers globally.

** On 01 March 2011 the ETF changed its underlying benchmark to track the MSCI Russia Issuers Capped 25% Index and subsequently changed its name to db x-trackers MSCI Russia Capped Index UCITS ETF. Prior to the change the ETF tracked the MSCI Russia Capped Index. Index values prior to the 01 March 2011 were re-based to match the level of the MSCI Russia Issuers Capped 25% Index on the 01 March 2011.

Fund Information	
Fund name	db x-trackers MSCI Russia Capped Index UCITS ETF* (*This is a synthetic ETF)
ISIN	LU0455009265
UCITS IV compliant	Yes
Share class currency	USD
Investment Methodology	Indirect Replication*
Portfolio Structure	Substitute Basket + Swap
Fund launch date	07 December 2007
Share class launch date	14 December 2009
TER	0.65% p.a.
Financial year end	31 December
Income treatment	Distribution
NAV per Share	USD 2.40 (31 August 2017)
Total Fund Assets	USD 182,418,480 (31 August 2017)

*ETF enters a swap agreement with an investment bank whereby the bank provides the ETF with the returns of the index adjusted to reflect certain index replication costs or enhancements.

Key Risks

- The Fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up.
- The Fund is exposed to less economically developed economies (known as emerging markets) which involve greater risks than well developed economies. Political unrest and economic downturn may be more likely and will affect the value of your investment.
- The value of an investment in shares will depend on a number of factors including, but not limited to, market and economic conditions, sector, geographical region and political events.
- The Fund is exposed to market movements in a single country or region which may be adversely affected by political or economic developments, government action or natural events that do not affect a fund investing in broader markets.
- The Fund will enter into a derivative with a counterparty (initially Deutsche Bank). If the counterparty fails to make payments (for example, it becomes insolvent) this may result in your investment suffering a loss.

MSCI Russia Issuers Capped 25% Index

The Index is a custom market capitalisation weighted index and is composed of the constituents of Russia's Standard Index, the MSCI Russia Index which currently includes Russia only. Constituents whose weights are greater than 25% are capped daily to 22.5% and quarterly to 20%. The remaining constituents are weighted according to their free float-adjusted market capitalisation applicable to foreign investors as a percentage of the remaining non-capped weight. If no issuers have weights exceeding the daily limits or the QIR limits, then all issuers are weighted according to their free float-adjusted market capitalisation of the MSCI Russia Index (i.e. 85% +/- 5% of Russia's investable equity universe). The Index is calculated in US Dollars on an end of day basis.

Key risk factors

An investment in an Xtrackers ETF may not be suitable for all investors. Past performance is not a reliable indicator of future results. Investments in funds involve numerous risks including, among others, general market risks, credit risks, foreign exchange risks, interest rate risks and liquidity risks. As such, the value of an investment in an Xtrackers ETF may go down as well as up and can result in losses, up and including a total loss of the amount initially invested.

Investors should be aware that Deutsche Asset Management (UK) Limited, any of its parents or any of its or its parents subsidiaries or affiliates (together referred to as Deutsche Asset Management) may from time to time own interests in the Fund which may represent a significant amount or proportion of the overall investor holdings in the Fund. Investors should consider what possible impact such holdings, or any disposal thereof, may have on them.

Disclaimer

db x-trackers is an undertaking for collective investment in transferable securities (UCITS) fund in accordance with the applicable laws and regulations and set up as open-ended investment company with variable capital and segregated liability amongst its respective compartments.

db x-trackers is incorporated in the Grand Duchy of Luxembourg, is registered with the Luxembourg Trade and Companies' Register under number B-119.899 and has its registered office at 49, avenue J.F. Kennedy, L-1855 Luxembourg. Deutsche Asset Management S.A. acts as the management company of db x-trackers.

The information contained in this document is provided for information purposes only. Any investment decision in relation to an Xtrackers ETF should be based solely on the latest version of the prospectus, the audited annual and, if more recent, un-audited semi-annual reports and the Key Investor Information Document (KIID), all of which are available upon request or on www.xtrackers.com. In the case of any inconsistency with the prospectus, the latest version of the prospectus shall prevail.
