

Factsheet | 31 March 2018

# Vanguard FTSE Asia ex Japan High Dividend Yield Index ETF (3085)

## An exchange-traded fund

**IMPORTANT:** Investment involves risk, including the loss of principal. Investors are advised to consider their own investment objectives and circumstances in determining the suitability of an investment in the Vanguard FTSE Asia ex Japan High Dividend Yield Index ETF (the "Fund"). If you are in any doubt, you should seek professional advice. Investors should refer to the fund prospectus for further details, including the product features and risk factors. Investors should not base investment decisions on this marketing material alone. Investors should note:

- The Fund aims to provide investment results that, before fees and expenses, closely correspond to the performance of the FTSE Asia Pacific ex Japan, Australia, and New Zealand High Dividend Yield Index ("Underlying Index").
- The Fund invests in securities markets that are considered to be emerging markets which involve a greater risk of loss than investing in more developed markets due to, among other factors, greater political, tax, economic, foreign exchange, liquidity and regulatory risks.
- The Fund invests in financial derivatives instruments ("FDIs"), which are more sensitive to changes in market prices of the underlying assets, and investing in FDIs may expose investors to a higher degree of fluctuation and the Fund may be exposed to credit risk on the counterparties with which it trades FDIs.
- Investing in high dividend yield securities may offer a higher rate of dividend yield. However, high dividend yield securities are subject to risks that the dividend could be reduced or abolished, or the risks that the value of the securities could decline or have lower-than-average potential for price appreciation.
- There is no guarantee that the constituent securities of the Underlying Index will declare or pay out dividends. Therefore, there is no guarantee that the Fund's investment objectives will be met. There is also no guarantee of dividend or distribution payments by the Fund during the period an investor holds shares in the Fund. Dividend yields from the Fund's investments may fluctuate up or down as a result of changes in the dividend policy or performance of the underlying constituent securities in which the Fund is invested. Further, there is no assurance that the distribution yield of the Fund is the same as that of the Underlying Index.
- The shares of the Fund are traded on the Stock Exchange of Hong Kong Limited ("SEHK"). Their prices on the SEHK are based on secondary market trading factors, and the Fund's market prices may deviate significantly from the net asset value.

### Key fund facts

Benchmark	FTSE Asia Pacific ex Japan, Australia, and New Zealand High Dividend Yield Index
Distribution schedule	Quarterly*
Net assets	\$315 million
Inception date	10 June 2014
Listing date	13 June 2014
