3086 HK

Data as of September 29, 2017

IMPORTANT: BMO NASDAQ 100 ETF is established under BMO ETF, an umbrella unit trust. Commissions, management fees and expenses all may be associated with this Sub-Fund. It may not be suitable for all investors and investors should not invest based on this marketing material alone. Investors should exercise caution before investing and read the BMO ETF prospectus (available at www.bmo.hk/etfs) for further details, including product features and risk factors. ETFs are not guaranteed and past performance is not indicative of future performance. Investment involves risks. The value of investments and the income from them can go down as well as up as a result of stock market and currency movements, and investors may not get back the original amount invested.

- BMO NASDAQ 100 ETF aims to provide investment results that, before fees and expenses, closely correspond to the performance of the NASDAQ-100 Index. This Sub-Fund concentrates its investment in securities listed on the NASDAQ Stock Market and is subject to concentration risk as a result of tracking the performance of markets in a single country (the US) and securities listed on a single exchange (the NASDAQ Stock Market). It is likely to be more volatile than a broad-based fund as it is more susceptible to fluctuations in value resulting from adverse conditions in the US. The value of securities in this Sub-Fund's portfolio may change on days when investors will not be able to purchase or sell units of this Sub-Fund as the NASDAQ Stock Market will be open when units of the Sub-Fund are not priced.
- The units of this Sub-Fund may trade at a substantial premium or discount to their NAV.
- The Sub-Fund is subject to tracking error risks due to factors such as fees and expenses and the representative sampling strategy that may be adopted by the Manager.
