

XIE Shares CLSA GARY ETF (3102)

January 2017
(As of 31 Dec 2016)

IMPORTANT: XIE Shares CLSA GARY ETF (the "Sub-Fund") is a sub-fund of XIE Shares Trust II, which is an umbrella unit trust established under Hong Kong law. The Sub-Fund is an exchange traded fund that provides investment returns, before fees and expenses, closely correspond to the performance of CLSA GARY Net Total Return Index (the "Index"). Investments involve risks, including the loss of principal. Investors are advised to consider their own investment objectives and circumstances in determining the suitability of an investment in the Sub-Fund described in this document. An investment in the Sub-Fund may not be suitable for everyone. If you are in any doubt, you should consult your own independent professional advisors.

Key risks of the Sub-Fund

- The Sub-Fund invests in high dividend yield securities which are subject to risks that the dividend could be reduced or abolished, or the risks that the value of the securities could decline or have lower-than average potential for price appreciation.
- The Sub-Fund invests in a number of Asian emerging markets. Investing in emerging markets involves a greater risk of loss than investing in more developed markets.
- Given that the index provider (and the Index) of the Sub-Fund is relatively new, the Sub-Fund may be riskier than other exchange traded funds tracking more established indices with longer operating history or indices sponsored by index provider with longer operating history.
- The Sub-Fund is not "actively managed", therefore when there is a decline in the Index, the Sub-Fund will also decrease in value.
- The price of the units in the Sub-Fund (the "Unit") is traded on the exchange at market price, which may be different from its net asset value.

You should read the prospectus of the Sub-Fund for further details, including their features and risks. Your investment decisions should not be based solely on this document.
