**IMPORTANT:** Investment involves risks. Investment value may rise or fall. Past performance information presented is not indicative of future performance. Investors should refer to the Prospectus and the Product Key Facts Statement for further details, including product features and risk factors. Investors should not base on this material alone to make investment decisions.

- CSOP S&P New China Sectors ETF (the "Sub-fund") is a physical index tracking exchange traded fund and it aims to provide investment results that, before deduction of fees and expenses, closely correspond to the performance of the underlying index, namely, S&P New China Sectors Index (the "Index").
- The Sub-Fund's investments are concentrated in mainland China- and Hong Kong-domiciled companies in selected consumption and service-oriented industries. The value of the Sub-Fund may be more volatile than that of a fund having a more diverse portfolio of investments.
- China is considered as an emerging market and investing in China market may involve increased risks such as liquidity risks, currency risks/control, political and economic uncertainties, legal/regulatory and taxation risks, settlement risks, custody risk and the likelihood of a high degree of volatility.
- The trading price of the Units on the SEHK is driven by market factors such as the demand and supply of the Units. Therefore, the Units may trade at a substantial premium or discount to the Sub-Fund's NAV.
- The Manager may, at its discretion, pay dividends out of capital. Payment of dividends out of capital or effectively out of the capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any such distributions may result in an immediate reduction of the NAV per Unit of the Sub-Fund.

## Investment Objective

The investment objective of the Sub-Fund is to provide investment results that, before deduction of fees and expenses, closely correspond to the performance of the S&P New China Sectors Index (the "Underlying Index").
