

# ComStage 1 DAX<sup>®</sup> UCITS ETF

Factsheet | All information as of 31 July 2017

## Key Risks

**IMPORTANT:** ComStage 1 DAX<sup>®</sup> UCITS ETF (the "Fund") may not be suitable for all investors. Investment involves risk, including loss of capital. Investors should not invest based on this factsheet alone. Investors should refer to the Hong Kong Prospectus (which is available from [www.comstage.com.hk](http://www.comstage.com.hk)) for further details, including product features and risk factors.

- The Fund aims to provide investment results that closely correspond to the performance of the DAX<sup>®</sup> TR Index (performance index) (the "Index").
- The Fund is subject to concentration risk as a result of tracking the performance of a single geographical region (Germany). It is likely to be more volatile than a broad-based fund as it is more susceptible to fluctuations in value resulting from adverse conditions in Germany.
- The units of the Fund may trade at a substantial premium or discount to their net asset value.
- The Fund is subject to tracking error risks due to factors such as fees and expenses and the representative sampling strategy that may be adopted by the Manager.

## Investment Objective

The investment objective of the ComStage 1 DAX<sup>®</sup> UCITS ETF Sub-Fund is to deliver a return to investors that, before fees and expenses, closely corresponds to the performance of the DAX<sup>®</sup> TR Index (performance index).

## Index Description

The investment universe of the DAX<sup>®</sup> TR Index comprises of the companies making up the Prime Standard segment of the Deutsche Boerse. It measures the performance of the 30 biggest companies with the highest turnover and covers about 80% of the market capitalization of the Prime Standard segment.

The DAX<sup>®</sup> TR Index is a capitalization-weighted index, the free market capitalization and trading volume are included in the calculation. The regular review of the DAX<sup>®</sup> takes place annually in September.

The index weighting of an individual DAX member is capped on a quarterly basis on the concatenation date at 10% of the index capitalization.

The DAX<sup>®</sup> TR Index is a performance index.

The ComStage 1 DAX<sup>®</sup> UCITS ETF (II) is a physically replicating ETF issued as a German Sondervermögen. Securities lending is explicitly excluded.
