

ComStage 1 DivDAX[®] UCITS ETF

Factsheet | All information as of 28 February 2018

Key Risks

IMPORTANT: ComStage 1 DivDAX[®] UCITS ETF (the "Fund") may not be suitable for all investors. Investment involves risk, including loss of capital. Investors should not invest based on this factsheet alone. Investors should refer to the Hong Kong Prospectus (which is available from www.comstage.com.hk) for further details, including product features and risk factors.

- The Fund aims to provide investment results that closely correspond to the performance of the DivDAX[®] Index (price index) (the "Index").
- The Fund is subject to concentration risk as a result of tracking the performance of a single geographical region (Germany). It is likely to be more volatile than a broad-based fund as it is more susceptible to fluctuations in value resulting from adverse conditions in Germany.
- The units of the Fund may trade at a substantial premium or discount to their net asset value.
- The Fund is subject to tracking error risks due to factors such as fees and expenses and the representative sampling strategy that may be adopted by the Manager.
- There is no guarantee the Fund will pay dividends. The Manager may at its discretion pay dividends out of capital of the Fund or pay dividend out of gross income while all or part of the fees and expenses of the Fund are charged to be paid out of the capital of the Fund. Any distributions involving payment of distributions out of or effectively out of the Fund's capital may result in an immediate reduction of the Net Asset value per Unit.

Investment Objective

The investment objective of the ComStage 1 DivDAX[®] UCITS ETF Sub-Fund is to deliver a return to investors that, before fees and expenses, closely corresponds to the performance of the DivDAX[®] Index (price index).

Index Description

The DivDAX[®], calculated by Deutsche Börse AG, is composed of the 15 companies from the leading German index, the DAX[®], with the highest dividend yields. The dividend yield is calculated by dividing the dividend paid by the closing price of the share on the eve of the payout. The Index is weighted by free-float market capitalization, and a weighting cap of 10% applies for each stock. The weightings are adjusted on a quarterly basis and the index composition is reviewed annually in September.

The Index was launched on 20 September 1999 with a base level of 100 points.

The ComStage 1 DivDAX[®] UCITS ETF (II) is a physically replicating ETF issued as a German Sondervermögen. Securities lending is explicitly excluded.
