

Data as of 31 October 2017

**Important Note :**

1. E Fund Citi Chinese Government Bond 5-10 Years Index ETF (the "Sub-Fund") is a passively managed exchange traded fund ("ETF") and is traded on the Stock Exchange of Hong Kong ("SEHK") like stocks. The investment objective is to provide investment result that, before fees and expenses, closely corresponds to the performance of the Citi Chinese Government Bond 5-10 Years Index (the "Index"). The Sub-Fund is a physical RMB Qualified Foreign Institutional Investor ("RQFII"), RMB denominated exchange traded fund investing directly in RMB denominated PRC Treasury Bonds through the Manager's status as a RQFII.
2. The Sub-Fund is subject to a) Investment risk, b) Concentration risk, c) Fixed income investment risk (including Interest rate risk, Liquidity risk, Credit downgrade risk, Issuer counterparty risk and Sovereign debt risk), d) RQFII regime related risks, e) RMB trading and settlement of Units risks, f) Dual counter risks, g) PRC related risks / single issuer risks, h) PRC tax risk, i) RMB currency risks, j) Government intervention and restrictions risks, k) Passive investments risks, l) New Manager and reliance on Investment Adviser risk, m) New index risk, n) Operational and settlement risk, o) Trading risks, p) Tracking error risk, q) Reliance on market maker risks and r) Termination risk.
3. The Manager makes a withholding income tax provision at 10% for the Sub-Fund's gross realised capital gains derived from trading of A-Shares (via RQFII) since the Sub-Fund's inception up to and including 14 November 2014. The Manager does not make withholding income tax provision for gross realised or unrealised capital gains derived from trading of A-Shares (either via Stock Connect or RQFII) from 17 November 2014 onwards. There are risks and uncertainties associated with the current PRC tax laws, regulations and practice in respect of capital gains realised via RQFII quota or Stock Connect on investments in the PRC (which may have retrospective effect). The potential application of tax treaties is also uncertain. The Sub-Fund may have greater tax liabilities in the PRC than provided for. Any shortfall between the provision and actual tax liabilities, which will be debited from the Sub-Fund's assets, will cause the Sub-Fund's NAV to be adversely affected. In this case, the then existing and subsequent investors will be disadvantaged as they will bear for a disproportionately higher amount of tax liabilities as compared to the liability at the time of investment in the Sub-Fund. On the other hand, the actual tax liabilities may be lower than the tax provision made. In that case, persons who have already redeemed their Units in the Sub-Fund before the actual tax liabilities are determined will not be entitled or have any right to claim any part of such overprovision.
4. You should not make any investment decision solely based on the information on this material alone. Please read the relevant offering documents for details including the risk factors before making any investment decisions.
5. Investment involves risk. Past performance is not indicative of future performance. This document has not been reviewed by the Securities and Futures Commission of Hong Kong.

1. Credit rating is given to the bond issuers by Standard & Poor, as of 31 October 2017. 2. Yield to Maturity ("YTM") is the discount rate that equates the present value of a bond's cash flows with its market price (including accrued interest). The Fund Average YTM is the weighted average of the Fund's individual bond holding YTM's based upon Net Asset Value ("NAV"). The measure does not include the fees and expenses. It is not indicative of the return of the Fund. 3. Source: Citigroup Index LLC, as of 31 October 2017. 4. Source: E Fund Management (HK) Co., Ltd., as of 31 October 2017. 5. Fund: NAV-to-NAV return, total return with dividend (if any) reinvested. 6. Performance calculated since the launch of the Fund (14 March 2014) to 31 October 2017.

**Note:** Past performance information is not indicative of future performance. Investors may not get back the full amount invested. The computation basis of the performance is based on the calendar year/period end, NAV-to-NAV, with dividend reinvested. These figures show by how much the Fund increased or decreased in value during the calendar year/period being shown. Performance data has been calculated in RMB/HKD, including ongoing charges and excluding subscription fee and redemption fee you might have to pay. Where no past performance is shown there was insufficient data available in that year/period to provide performance. The benchmark of the Fund is Citi Chinese Government Bond 5-10 Years Index Fund launch date: 2014
