

# Amundi FTSE China A50 Index ETF

Stock Codes: 2843 (HKD) / 82843 (RMB)

## Important Information:

Amundi FTSE China A50 Index ETF (the "A50 ETF") is a physical exchange traded fund seeking to provide investment results that, before fees and expenses, closely correspond to the performance of the FTSE China A50 index (the "Index").

- Investment involves risks and investors may lose substantial part of their investment in the A50 ETF. Investors should not only base on this material alone to make investment decisions, but should read the A50 ETF's offering documents, including the full text of the risk factors.
- The A50 ETF is traded on the exchange at market price, which may be different from its net asset value. The A50 ETF carries risks such as liquidity risk and risk of trading suspension.
- The A50 ETF is subject to tracking error risks and risks associated with passive investments.
- Investing solely in A-share market, which is inherently a market with restricted access (such as RQFII and Stock Connect constraints), may subject the ETF to emerging market risk (such as economic, political, tax, foreign exchange, regulatory, volatility and liquidity risks) and concentration risk.
- RMB is currently not freely convertible and is subject to exchange controls and restrictions. Non-RMB based investors are exposed to foreign exchange risk.
- The Manager may, at its discretion, pay dividends out of capital or effectively out of capital. Payment of dividends out of capital or effectively out of the capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any such distributions may result in an immediate reduction of the NAV per Unit.

## October 2017

### Investment objective:

To provide investment results that, before fees and expenses, closely correspond to the performance of the FTSE China A50 Index (the "Index").

### Description of the Index:

The FTSE China A50 Index comprises the largest 50 A-Share companies by full market capitalisation of the securities listed on the Shanghai and Shenzhen stock exchanges.
