iShares EURO STOXX 50 Index ETF

As of 31/07/2018

iShares[®]
by **BLACKROCK**[®]

IMPORTANT: Investment involves risk, including the loss of principal. Investors should refer to the Prospectus and Key Facts Statement of the iShares EURO STOXX 50 Index ETF (the "ETF") for details, including the risk factors. Investors should not base investment decisions on this marketing material alone. Investors should note:

- The ETF aims to provide investment results that, before fees and expenses, closely correspond to the performance of the EURO STOXX 50 Index.
- The ETF's investment in equity securities is subject to general market and economic risks, whose value may fluctuate due to various factors, such as changes in investment sentiment, political and economic conditions and issuer-specific factors including those relating to the Eurozone.
- All units will receive distributions in the base currency, EUR, only. In the event that a unitholder has no EUR account, the unitholder may have to bear the fees and charges associated with the conversion of such dividend distributions from EUR to USD, HKD, RMB or any other currency; and (ii) the other bank or financial institutional fees and charges associated with the handling of the distribution payment. Unitholders are advised to check with their brokers regarding arrangements for distribution.
- Investors may be subject to additional costs or losses associated with foreign currency fluctuations between the base currency and the USD, HKD or RMB trading currency. Furthermore, RMB is currently not freely convertible and is subject to exchange controls and restrictions.
- The ETF may be subject to tracking error risk, which is the risk that its performance may not track that of the underlying index exactly.
- The units of the ETF are traded on the SEHK. The trading price of the units is subject to market forces and may trade at a substantial premium or discount to the ETF's NAV, which may also increase due to the differences in trading hours between the relevant European Stock Exchanges and the SEHK. As the relevant European Stock Exchanges may be open when units of the ETF are not priced, the securities' values in the ETF may change on days when investors cannot trade the units.
- The price of units traded in different counters may deviate significantly. If there is a suspension of the inter-counter transfer of units between the counters and/or any limitation on the level of services provided by brokers and CCASS participants, unitholders can only trade their units in one counter.
- The Manager may at its discretion pay distributions out of capital, or effectively out of capital, of the ETF. Payment of distributions out of capital or effectively out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any such distributions may result in an immediate reduction of the NAV per unit.

INVESTMENT OBJECTIVE

The iShares EURO STOXX 50 Index ETF seeks to track the performance of an index composed of 50 of the largest companies in 12 Eurozone countries.

WHY 3155 / 83155 / 9155?

- 1 Physical access to the 50 largest Eurozone companies
- 2 Trade European equity exposure in three trading counters (HKD, RMB, USD), in Asian hours
- 3 Regional, large-cap companies exposure

Performance is calculated based on NAV-to-NAV with dividend reinvested. Performance is calculated in the base currency of the Index Fund, including ongoing charges and taxes, and excluding your trading costs on SEHK. Investment involves risk, including the loss of principal. Past performance does not represent future returns.

SECTOR BREAKDOWN (%)

As a percentage of NAV of the Fund. Based on Global Industry Classification Standard (GICS). Please note this data excludes underlying investments of any exchange traded funds that may be invested by the Fund

COUNTRY BREAKDOWN (%)

Geographic exposure relates principally to the domicile of the issuers of the securities held in the product, added together and then expressed as a percentage of the product's total holdings. However, in some instances it can reflect the country where the issuer of the securities carries out much of their business. Due to rounding, the total may not be equal to 100%.

Disclaimer: Unless otherwise specified, all information as of the month end. Sources: BlackRock and STOXX Limited. The above iShares Funds data is for information only. Investment involves risk, including possible loss of principal. Investment in emerging market countries may involve heightened risks such as increased volatility and lower trading volume, and may be subject to a greater risk of loss than investment in a developed country. Before deciding to invest, investors should read the Prospectus and Key Fact Statements for details, including the risk factors. Performance is calculated on NAV to NAV basis, inclusive of all transaction fees and assumes dividend reinvestment. The investment returns are denominated in base currency, which may be a foreign currency. If so, US/HK dollar-based investors are therefore exposed to fluctuations in the US/HK dollar/foreign currency exchange rate. Rates of exchange may cause the value of investments to go up or down. Investors may not get back the amount they invest. Individual stock prices/performance do not represent the return of the Fund. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than the original cost. Index returns are for illustrative purposes only and do not represent actual iShares Funds or iShares Trusts performance. Index performance returns do not reflect any management fees, transaction costs or expenses. Indexes are unmanaged and one cannot invest directly in an index. Past performance does not guarantee future results.
