

IMPORTANT:

- Horizons S&P Asia ex JANZ IT ETF (the "Fund") is an exchange traded fund and seeks to provide investment results that, before deduction of fees and expenses, closely correspond to the performance of the S&P Pan-Asia ex JANZ LargeCap Financials Index (the "Underlying Index"). The Fund is an investment fund. There is no guarantee of the repayment of principal. Therefore your investment in the Fund may suffer losses.
- Under normal market conditions, the results of companies in the financial services sector may be adversely affected by increases in interest rates, loan default rates and decreases in the liquidity of financial markets. In addition, financial services companies in some countries in Asia are subject to extensive governmental regulation, which may change frequently and have a cumulative adverse affect on their profitability and the scope of their business activities.
- The Fund is subject to concentration risk as a result of tracking the performance of a single geographical region (Asia). The Fund may likely be more volatile than a broad-based fund, such as a global equity fund, as it is more susceptible to fluctuations in value of the Underlying Index resulting from adverse conditions in Asia.
- As the Underlying Index relates to Asian emerging markets, the Fund is subject to a greater risk of loss compared with investments in developed markets due to greater political, economic, taxation and regulatory uncertainty and risks linked to volatility and market liquidity.
- The Fund is not "actively managed", therefore when there is a decline in the Underlying Index, the Fund will also decrease in value. Mirae Asset Global Investments (Hong Kong) Limited ("the Manager") will not adopt any temporary defensive positions against any market downturn. Investors may lose part or all of their investment.
- Generally, retail investors can only buy or sell units of the Fund ("Units") on the Stock Exchange of Hong Kong Limited ("HKEx"). The trading price of the Units on the HKEx is driven by market factors such as demand and supply of the Units. Therefore, the Units may trade at a substantial premium/discount to its net asset value ("NAV").
- Due to fees and expenses of the Fund, liquidity of the market, foreign exchange costs, and changes to the regulatory policies, the Fund's return may deviate from that of the Underlying Index.
- The market prices of underlying securities listed on stock exchanges which are established outside Hong Kong may not be available during part or all of the HKEx trading sessions due to trading hour differences which may result in the Fund's trading price deviating away from the NAV.
- Dividend distributions are not guaranteed, and therefore, investors may not receive any dividends from the Fund.
- Investment involves risk. Investors may lose part or all of their investment. Investors should not base on this document alone to make investment decisions. Before making any investment decision, prospective investor should read the Fund's offering documents (available on www.horizonsetfs.com.hk) carefully for further details, including the product features and risk factors, and should consider seeking independent professional advice. The contents of the afore-mentioned website is prepared and maintained by the Manager and has not been reviewed by the Securities and Futures Commission of Hong Kong ("SFC").

Investment objective and investment strategy
Investment objective

The Fund seeks to provide investment results that, before deduction of fees and expenses, closely correspond to the performance of the Underlying Index.

Strategy

The Manager intends to invest all, or substantially, all of the assets of the Fund directly in substantially all securities constituting the Underlying Index in substantially the same weightings as these securities have in the Underlying Index to achieve the investment objective of the Fund ("Replication Strategy").

Where the adoption of a Replication Strategy is not efficient or practicable or is otherwise at the Manager's absolute discretion, the Manager may hold a representative sample of the constituent securities of the Underlying Index selected by the Manager using quantitative analytical models to derive a portfolio sample ("Representative Sampling Strategy"). Investors should note that the Manager may switch between the Replication Strategy and the Representative Sampling Strategy without prior notice to investors, in its absolute discretion.

The Manager has no intention to invest in financial derivatives instruments (or to adopt a synthetic replication strategy) nor to engage in securities lending or repurchase transactions in respect of the Fund. Any change in the Manager's intention to enter into any of the above transactions in respect of the Fund is subject to prior approval of the SFC and not less than one month's prior notice (or such other notice period as agreed with the SFC will be given to unitholders should there be a change in such intention).

The Fund will not invest in A-shares.
